PROFESSIONAL SUMMARY

Senior Cybersecurity / ISSO professional and USMC veteran with active Top-Secret clearance and 9+ years securing DoD and federal systems. Proven leader of RMF lifecycle execution in eMASS — control selection through ATO and continuous monitoring — across Army, Navy, and federal civilian environments. CISSP, CISM, and CGE-P certified, with hands-on GRC engineering experience implementing NIST 800-53 controls as infrastructure-as-code (Terraform, AWS, OSCAL). Supervised teams of 18+ ISSOs, SCAs, and ISMs delivering consecutive ATO approvals on mission-critical systems.

CLEARANCE, CERTIFICATIONS & EDUCATION

- **Clearance:** Active Top Secret (TS) — U.S. Department of Defense
- **Certifications:** CISSP #921058 | CISM #221843622 | CGE-P (Certified GRC Engineer – Practitioner) | AWS Cloud Practitioner | AWS AI Practitioner | CompTIA Security+ | MTA 98-349
- **Education:** B.S., Information Technology and Security — Campbell University

CORE COMPETENCIES

- **Frameworks & Compliance:** RMF (NIST 800-37) | NIST 800-53 Rev 4/5 | NIST 800-171 | FISMA | CNSSI 1253 | FedRAMP | STIG/SRG | OSCAL 1.1.2
- **GRC & Vulnerability Tools:** eMASS | eMASSter | VRAM | ACAS/Nessus | SCAP Compliance Checker | Evaluate-STIG | STIG Viewer | Vulnerator | HBSS
- **Cloud & Infrastructure:** AWS (EC2, S3, IAM, Lambda, Bedrock, EventBridge, Security Hub) | Terraform | CloudFormation | Checkov | Docker | GitHub Actions CI/CD
- **Documentation & Process:** SSP | SAR | RAR | POA&M | Risk Assessments | FISMA Reporting | Continuous Monitoring | ATO Support

PROFESSIONAL EXPERIENCE

Cybersecurity Supervisor | COLSA Corporation – Orlando, FL

Jul 2021 – Sep 2025

- Supervised 18 personnel — 5 Security Control Assessors, 2 Information Security Managers, and 11 ISSOs — across multiple cybersecurity programs supporting Army and DoD systems.
- Directed RMF lifecycle execution and compliance reviews for enclaves and mission-critical applications; conducted pre/post-assessment teleconferences leading to consecutive ATO approvals.
- Led end-to-end QA reviews of all RMF artifacts within eMASS prior to AO review, ensuring compliance, accuracy, and audit readiness across multiple DoD authorization packages.
- Annotated assessment procedure (AP) test results in eMASS and produced final Security Assessment Reports (SARs) and Risk Assessment Reports (RARs) supporting ATO decisions.
- Partnered with program management, engineering, and government stakeholders to integrate security throughout the system lifecycle and align with federal compliance requirements.

Senior Cybersecurity Analyst | ECS – Orlando, FL

Feb 2021 – Apr 2021

- Conducted Security Control Assessments leading to 3-year ATO; drafted POA&Ms with technical mitigation strategies and milestones.
- Ran and analyzed ACAS scans, uploaded test results into eMASS, and coordinated remediation with engineers; provided STIG and SDLC security guidance.
- Authored Information Security Plans, Configuration Management Plans, Incident Response Plans, and Contingency Plans; supported penetration testing.

Information System Security Officer (ISSO) | Naval Air Warfare Training Systems Division (NAWCTSD) – Orlando, FL

Jul 2020 – Feb 2021

- Developed and maintained RMF A&A packages for IDEA program systems, ensuring authorization readiness and continuous compliance.
- Managed continuous monitoring strategies, vulnerability reporting in VRAM, and authorization status tracking across multiple training systems.
- Utilized ACAS, SCAP Compliance Checker, and Vulnerator for system scans and security posture reporting; oversaw eMASS documentation and artifact integrity.

Information System Security Officer (ISSO) / IT Specialist (INFOSEC) | Naval Medical Center Camp Lejeune – Camp Lejeune, NC

Jul 2018 – Jul 2020

- Led cybersecurity governance, risk management, and compliance for classified and unclassified defense programs; served as primary cybersecurity advisor to program managers, system owners, and senior leadership.
- Oversaw development of SSPs, SARs, POA&Ms, and executive cybersecurity briefings; coordinated incident response and corrective action planning; assisted RMF Program Manager in maintaining network C&A.
- Operated ACAS for enterprise vulnerability management; managed HBSS product outages and STIG-aligned patching across the network.

Information Security Analyst & Systems Administrator | Naval Medical Center Camp Lejeune – Camp Lejeune, NC

Jul 2016 – Jul 2018

- Implemented cybersecurity controls protecting 2,000+ end users across clinical and administrative systems handling sensitive healthcare data; administered Windows servers, workstations, and networked systems.
- Managed account provisioning, RBAC, and deactivation to enforce least privilege; reported and tracked NTDs, CTOs, and IAVAs in OCRS while maintaining HIPAA compliance.

Earlier Experience

- IT Support Assistant / Computer Assistant — Naval Medical Center Camp Lejeune, NC (Dec 2015 – Jul 2016): Tier I support for 1,000+ clinical/administrative users; workstation deployment and CAC reset.
- IT Hardware Specialist — Strategic Resources Inc., Camp Lejeune, NC (Nov 2014 – Dec 2015): First-line support to AHLTA/CHCS users; resolved 1,600+ Remedy tickets in one year.
- Jr. IT Specialist — Yoh, Camp Lejeune, NC (Aug 2014 – Nov 2014): Tier 2 desktop support; access permissions; network connectivity troubleshooting.
- Administrator Assistant (VA Work Study) — NC Department of Commerce, Jacksonville, NC (Jan 2013 – Aug 2014): Database entry and help desk support for veteran services.
- Aircraft Maintenance Administration Specialist — U.S. Marine Corps, New River, NC (Apr 2007 – Apr 2011): Maintained OOMA NALCOMIS accounts, privileges, and security for 100+ maintenance personnel; managed backup/recovery and equipment inventory.

GRC ENGINEERING PORTFOLIO (GITHUB)

MedVault — OSCAL-Driven Continuous ATO Pipeline (FedRAMP Moderate) github.com/joserodriguezthe1/medvault-ato

End-to-end NIST RMF execution for a cloud-native federal SaaS system. Terraform + Checkov policy-as-code, CI pipeline emitting machine-readable OSCAL Assessment Results, full OSCAL document family (Profile, Component Definitions, SSP with 13 control implementations), POA&M tracking, continuous monitoring dashboard, Trivy scanning, Cosign image signing, CycloneDX SBOMs.

OffboardIQ — AI-Powered RMF Employee Offboarding Agent github.com/joserodriguezthe1/offboardiq

AWS Bedrock agent (Claude Haiku 4.5) automating full IAM offboarding in <60 seconds via 4 Lambda action groups. Implements NIST SP 800-53 controls AC-2, AC-3, AC-6, PS-4, IA-4, AU-2/9/11/12, IR-6, SC-28, SI-12 with S3 evidence archival and DynamoDB audit logging.

NIST RMF Automated POAM System github.com/joserodriguezthe1/nist-rmf-automated-poam-system

AWS-native automated POAM pipeline (Security Hub + GuardDuty + EventBridge + Lambda + DynamoDB) mapping findings to NIST SP 800-53 control families with risk-based milestone scheduling (HIGH 30 / MED 90 / LOW 180 days); implements CA-7 continuous monitoring with REST API and dashboard.
